

DYNAMIQ INTRODUCES THE GRAND TURISMO TRANSATLANTIC SUPERYACHT RANGE AT THE MYS 2015

During the **Monaco Yacht Show 2015**, **Dynamiq** showed its first range of yachts, named “**Grand Turismo Transatlantic**”, whose aim is to convey the philosophy of Grand Touring cars in the nautical field, offering performance, luxury and range.

The **Dynamiq GTT** is available in three models of manageable size: the **38.6 metre D4** base model, the **D4 S** sport version and the lengthened **40 metre D4 L** limousine version.

With a hull developed by leading Dutch naval architects **Azure** and optimization by hydrodynamic specialists **Van Oossanen**, these yachts feature a highly efficient shape with a vertical stem.

The base model and the limousine version are equipped with two **MAN V12 1800 1324 kW** diesel engines and **Fortjes** pod drive propulsion to give a maximum speed of **21 knots**, while the **D4 S** features two **MTU V16 1790 kW** engines and larger pods for a top speed of **25 knots**. In addition, the **S** version features carbon fiber styling details to the interior and exterior, model-specific paint options and further interior options not available on the base model.

All three models are built in aluminum to the highest standards of safety and emission control, and feature **RINA Comfort Class** and **Green Star Plus** notations as well as **LY3** commercial code equivalence.

On board, four or five guest cabin arrangements are available with crew quarters for six people. The interior design is conceived by the London-based studio **Bannenberg and Rowell**.

The **Dynamiq** online configurator is outstanding. It allows clients to select everything right on the company's site at www.bedynamiq.com – from the exterior paint scheme with changes viewed in real time on the virtual model to the interior finish, technical equipment, style accents, tender, crew uniforms, toys and even a crew car. The configurator features full pricing for every element, while a running total gives the exact price and delivery date for the customized yacht.

*"Our goal was to create a next generation yacht for a new era – efficient, clean, easy to order and customize. And that's what **Dynamiq** is all about,"* explains **Sergei Dobroserdov**, the company's founder and CEO.

The base price for the **D4** model is **€13,900,000**, while the **D4 L** will start from **€14,750,000**. The **D4 S** is available from a start price of **€15,500,000**.

In **2014** the keel of the first **Dynamiq D4** was laid at **NCA** shipyard in Carrara, **Italy**. The yacht is scheduled to be launched and delivered in the **summer** of **2016**.
