

Launched: first Dynamiq D4 series superyacht Jetsetter revealed

The much anticipated first 39-metre superyacht in Dynamiq's new D4 series was recently launched. *M/Y Jetsetter*, as she was christened during her launch in Marina di Carrara in Italy, is the vision of Sergei Dobroserdov whose aim was to create a modern 'Grand-Touring' superyacht that could offer a powerful, efficient, and comfortable experience at sea.

The two Dutch underwater specialists, Azure and Van Oossanen Naval Architects developed and optimised the slender and efficient hull on which *Jetsetter* is based. By fitting the yacht with twin Fortjes propulsion pods, *Jetsetter* offers a top speed of 21 knots with a cruising range of 3,000nm. To ensure a smooth experience while underway and at anchor, electrically driven CMC stabilisers are fitted to keep *Jetsetter* in shape no matter the conditions.

The experienced designed team at Bannenberg & Rowell were called upon to create a stylish and sophisticated interior. Eight guests are welcomed across four luxurious staterooms and generous living areas that have been fitted with loose furniture for easy customisation of spaces. Decorative touches are by Trussardi Casa.

Listed for sale at €14,500,000 through IYC broker Scott Jones, *Jetsetter* is scheduled to be displayed at the upcoming Monaco Yacht Show where she will be available for viewings.
