Alongside this 33m version, Dynamiq will offer also a **30m** and a **40m** version. The exterior design comes from Dobroserdov Design, the interior is a creation by Giuseppina Arena. The full-aluminum yacht features the **Fast Displacement Hull Form** by the Dutch company Van Oossanen.

“For the G330 we developed a special edition fast displacement hull with a wide body, long roll period and an exceptional top speed for this size and type of vessel,” says studio Managing Director Perry van Oossanen. “By reducing pitching, our patented Hull Vane adds efficiency and even more comfort.”

The Global 330 will be equipped with two MAN V8 1200 diesel engines. The top speed is reached at 16 knots. At the economical speed of 10 knots, the vessel has a moderate fuel consumption of 62 liters per hour. The range is 4,000 nautical miles at 8 knots and 3,100 nm at 10 knots.
