The Jetsetter Superyacht Is In A League Of Its Own

Boasting a length of 127 feet, the luxurious Jetsetter superyacht was created by a shipyard named Dynamiq, and it provides a perfect mix of raw power and unmatched comfort. Jetsetter is actually in a league of its own, as it boasts a shallow draft of just 5.7 feet, which means that it can tackle the waters of the Bahamas without any issues.
The Jetsetter Superyacht Is In A League Of Its Own

The range is somewhere at around 3,000 nm, so anyone lucky enough to own this thing will be able to enjoy memorable trips all over the world. The yacht’s fast displacement hull was designed by Azure Yachts and Van Oossanen Naval Architects with comfort in mind, and it flaunts electrically driven CMC stabilizers. Even when it reaches its top speed of 21 knots, Jetsetter doesn’t compromise on comfort and safety. The main deck is reserved entirely for crew operations and entertainment, while the lower deck comprises the accommodations. Future owners will be able to customize the vessel extensively, whether we’re talking about its furnishings, finishes or amenities.
